

Behringer WING EDIT Update

Version: 1.3.1 (24 May 2024)

Overview:

WING EDIT is an on and offline editor that provides you with comprehensive remote control and intuitive show preparation for your Behringer WING console. Version 1.3 includes multiple functionality adjustments, workflow optimizations and bug fixes. Details are provided in this document.

NOTE: WING EDIT is compatible with WING Firmware 2.1 or higher

New Features:

- USB player/recorder control via the clip list on mixer
- Library functions for local show control (remote function not implemented yet)
- Local clip player (Library) for clip playback on PC, Mac or Raspberry Pi
- Support for 64-bit Raspberry Pi OS

Bug Fixes:

- Preamp gain steps for connected AES devices
- Customization editor for icon, color, and name
- Dynamic EQ in Gate Slot synchronization when not connected to mixer
- Touch control over local fader bank
- Mac only: fixed crash after channel rename (ICON/NAME/COLOR overlay)
- Fixed libc6 requirement to v2.31 for Raspberry PI OS (Bullseye)

Changed:

- Updated several GUI parts to match mixer look and feel
- Updated JUCE to version 7.0.12
