

Changelog

[3.0] - 2024-01-16

Added

- support for Wing protocol (use of Wing on both ports)
- stereo phones mode (monitor mode), hold CFG and press encoder to enable/disable, hold gain and turn encoder to select aes50 channel pair
- new split modes supporting 2 or 3 stacked units
- converter mode (master, ADC out on ADAT and P16)

Changed

- selected phones channel stored in persistent memory
- removed 'analogue snake replacement' modes (user needs to stay on 2.x if these are required)

Fixed

- sporadic connection issues on port B (on old hardware only)
